

Hi,

Thanks for your enquiry.

I have attached a price list with the coffee machine prices and the prices of the coffee and other products we can supply.

Feel free to look at the web site for Perfect Coffee at [www.perfectcoffeatwork.com.au](http://www.perfectcoffeatwork.com.au). There you will see more photo's of the machines and other useful information.

- ▶ We will supply, install and program all Automatic Espresso Coffee Machines. You have the ability to make the espresso while frothing the milk at the same time. It takes 25 seconds to make 1 espresso or 2 at the same time (cups side by side). While these are being made you can froth and heat the milk. Two complete coffees made in less than a minute. These machines have the ability to manually froth the milk with the front spout or use the automatic side frother.
- ▶ The machine will be serviced and maintained on a regular basis which will depend on usage (approximately every 200 coffees, roughly every 10 to 15 working days).
- ▶ The machines are upgraded every 2 years as the new models are released.
- ▶ If you have a problem with the machine it will be rectified within 24 hours of the call, either repaired or replaced. At present, we are responding to machine difficulties within 4 hours.
- ▶ If you choose to hire the machine, you must purchase the coffee from us at \$30.00 per kg which will make between 100 and 120 coffees. It is a premium blend coffee, very yummy! We can also supply you with sugar sticks, decaffeinated coffee and other coffee consumables.
- ▶ We will train you and your staff to make the various coffee's (short black, long black, cappuccino, latte, mocha, hot chocolate).

We are so confident in the machine, the coffee and our service that we offer **1 week free trial** (coffee at clients cost) and no contracts if you decide to continue.

Sounds good!

Hope to hear from you soon.
